British Columbia Inventory of Waste Sites Containing PCBs

November 1989

BC MINISTRY OF ENVIRONMENT

92-01044/

BRITISH COLUMBIA INVENTORY OF WASTE SITES CONTAINING PCBs

The attached tables of data present a summary of PCB waste storage site information maintained by the Provincial Ministry of Environment as of October 23, 1989. The information presented pertains only to private or public lands under Provincial jurisdiction. A separate report maintained by Environment Canada provides data on lands or institutions under Federal jurisdiction.

The inventory identifies the owner or operator by company name, site location, quantity, and type of waste. Materials are characterized as "high concentration", "low concentration", or "concentration unknown".

Concentrations of PCBs greater than 500 ppm are listed as "high concentration". The "low concentration column includes items such as debris, soil, contaminated water and contaminated mineral and other oils which have PCB concentrations less than 500 ppm. The "concentration unknown" column lists wastes where the level of contamination is not known.

The inventory consists of 423 sites.

BRITISH COLUMBIA INVENTORY OF PCB WASTE IN STORAGE
10/23/89

Company Name	Site Location	WASTE DESCRIPTION quantity	type	AMOUNT OF PCB IN STORAGE kilograms (Kg) or liters (L) high conc.	low conc.	conc. unknown	total high conc.
